

BACKGROUND

e-Governance is the application of Information and Communication Technology (ICT) for delivering Government services, exchange of information communication transactions, integration of various standalone systems and services between Government-to-Citizen (G2C), Government-to-Business (G2B), Government-to-Government (G2G) as well as back office processes and interactions within the entire Government framework. A host of utility and e-commerce services are now made available to all sections of citizen to their doorstep in online and mobile platform. The Government of India is visioning to promote e-Governance through 'Digital India' programme for electronic delivery of services uniformly throughout the country and it is going to play a pivotal role in delivering information and services to the poor and underserved citizens living in the rural areas of the country.

Moreover, cashless transactions through electronic channels like Bank cards, Internet and mobile banking, UPI Apps, Digital Wallets, QR Codes, AEPS has gained a significant importance for general public. Higher degree of cashless transactions may play an important role in curbing corruption and thus speed up economic growth of the country. However, lack of technology, infrastructure, skill and awareness may hamper the adaptation of cashless transactions in rural areas. Under this scenario, it is the urgent need of the hour for awareness generation, skill enhancement of RD functionaries for mass use of digital payment methods for steady shifting towards cashless transactions in rural India.
