

BACKGROUND

eGramswaraj is a comprehensive online software solution which attempts for automation of Gram Panchayat functions. It is a digital platform specifically designed for the PRIs to address various activities. It also showcases the local resources, cultural and socio-economic conditions of Gram Panchayat to the rest of the world. eGramswaraj Portal strengthen and promote e-Governance in PRIs and it has been launched across the country to provide panchayats a single interface to execute and manage various development schemes of PRIs. eGramSwaraj application has been developed as part of PES which aims to bring efficiency and increased transparency and to enhance the credibility of Panchayats. eGramswaraj will facilitate decentralized planning, progress reporting and work based accounting and asset management.

Moreover, the Government of India is visioning to promote e-Governance through 'Digital India' programme for electronic delivery of services uniformly throughout the country and it is going to play a pivotal role in delivering information and services to the poor and underserved citizens living in the rural areas of the country. It is the need of the hour is to equip PRI functionaries with adequate knowledge and skills in various features, work flow and technical issues of eGramSwaraj and other related e-Governance services.
